WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 320 x 260 mm from 8 mm steel plate; square the edges, round the corners to about 5 mm and deburr.

Measure from the front edge (the operator's side) and sideways from the centre line. The hole picture in the plan repeats every position.

Lift screw hole 25 mm on the centre line, 110 mm from the front edge.

Bench bolt holes 11 mm, 145 mm each side, 15 and 245 mm from the front.

Shield feet: drill 5.0 and tap M6, 126 mm each side, 40 and 160 mm

from the front. Fan bracket: drill 5.0, tap M6, 146 mm right, 70 and

150 mm from the front.

Mark the column outline: 80 x 60 mm, centred, 175 to 235 mm from the front edge. The column is welded here in assembly step 1.

Check: lay the shield feet and fan bracket on it; the holes line up.
